Rusal Aughinish  
Aughinish Island  
Askeaton  
Co. Limerick

To whom it may concern,

Rusal Aughinish contracted United Metals together with Foynes Engineering to dismantle and remove our Inner Berth Loader (350 tonne machine on the jetty terminal for loading ships). These works took place on a live working jetty without disruption to normal operations. There was no accident, incident or safety issue during this 3 week operation. The loader was successfully removed under schedule.

Rusal Aughinish would have no problem recommending United Metal for demolition work and would highly recommend them as a safe, competent contractor.

Yours sincerely  
Thomas J. Hayes  
Senior Mechanical Project Engineer  
Rusal Aughinish
