Re: United Metals Recycling

To whom it may concern,

The project delivery specialists

United Metals Recycling were approached and contracted to supply a competent and highly skilled demolition crew for the strip out of the Dell EMF 3 Plant in Raheen Business Park, Limerick.

It involved the complete internal strip out of a 30,000sqm production area which included approximately 2000 tonnes of redundant mechanical equipment, mechanical services, electrical services, structural platforms and redundant rooms. Some of the internal strip out work was carried out in the close vicinity of existing live mechanical and electrical services which needed to be maintained throughout the demolition schedule.

UMR were given an aggressive six week schedule for completion of the works. The demolition works were completed within the time scale requested in a highly satisfactory manner.

All EHS requirements and PM Group high Safety expectations were met and surpassed in a very professional manner.

The Management Team of Tony Donlon, David Hegarty and Pat Lyons showed a constant commitment to the project throughout the contract period and their professional approach to the execution of the contract was a crucial factor in the success of the project.

Project Management Group would highly recommend UMR to other prospective clients and would also look forward to working with them again in the future where similar services are required.

Yours sincerely,

Chris McMahon
Associate Director – PM Group
