

To Whom it May Concern

10th February 2014

This is to verify that United Metal Recycling Ltd. dismantled, processed and removed Boeing 727-100 aircraft S/N 19262 from the Transaero Engineering Ireland Ltd.'s facility at Shannon Airport.

We are satisfied that United Metal Recycling Ltd. worked to a very high standard during the decommissioning process and were cognisant of all required safety considerations.

United Metal Recycling Ltd. adhered to a stringent environmental, security, health and safety policy during the decommissioning process.

We would have no hesitation using or recommending United Metal Recycling Ltd. for similar projects that may arise.

Regards,

Tom Kirrane

Facilities Manager,

Transaero Engineering Ireland Limited,

Shannon Airport
